### Desktop Connector - Action Needed

This pertains to all customers with Docs project members that use [Desktop Connector](#). Over the next few months, Autodesk will be requiring existing Desktop Connector users to upgrade to the latest version in order to maintain access to Docs. Later this year, Desktop Connector versions released between May 1, 2019 and December 8, 2021 will no longer be supported. Users with the older versions will begin to see pop-up messages encouraging them to update Desktop Connector by a specific date (users with the oldest versions will be required to upgrade by May 2022, with the remainder between June and September 2022). If a user does not upgrade to the latest version before the required date, Desktop Connector will not connect to Docs (but the user can still access Docs through the web browser).  
For full details on the versions and upgrade schedule, please refer to this [blog post](#).

### Just Released: Revit 2023

It's Spring time and that means a new release from Autodesk. This 2023 version of Revit did not disappoint. It is packed with user requested functionality updates! Here are a few to highlight:

- Conditional formatting for family and types in schedules.
- Displace elements in 2D views
- Filter by sheets in schedules
- Floor folding lines and split lines
- Improved orientation for generic annotations
- Multi-leader Tag enhancements
- Swap views on a sheet
- Tag all displaced elements in 3D views
- Maintain System of demolished elements
- Measure in 3D

Look for a notification in your Autodesk Account letting you know 2023 Autodesk products are available, or check with your company's account administrator.

[Read more](#) details about this new Revit release and join us in a future webinar to see them live.

### A sample of our Upcoming Classes - New Classes Added:

Software	Class	Date / Time
	RM101 - Revit MEP - Electrical Fundamentals (Online - 6 Morning Sessions)	May 24, 25, 26, 31 June 1, 2 9:00am - 12:00pm ET
	AC101: AutoCAD 1 - Fundamentals (Online - 6 Morning Sessions)	May 24, 25, 26, 31 June 1, 2 9:00am - 12:00pm ET
	CV101: Civil 3D - Fundamentals (Online - 6 Afternoon Sessions)	May 10, 11, 12, 17, 18, 19 1:00 pm - 4:00pm ET
	FS101: Fusion 360 - Introduction to Parametric Modeling (Online - 6 Afternoon Sessions)	June 7, 8, 9, 14, 15, 16 1:00 pm - 4:00pm ET
