

Hi,

Start out 2023 with NEW approaches to work. We can support your efforts to be innovative, efficient and cost effective. Need assistance with a future project? We can augment your staff or consult with you to improve your workflows with cutting-edge software solutions and training. Contact us by phone at 888-355-0081 or email us today.

Sincerely,

The MicroCAD Team

What is Scan to BIM?

Next step toward BIM adoption

BLOG

What is SCAN to BIM?

SCAN to BIM is an augmented reality technology that allows the capture of physical data and its conversion into digital 3D models. This advanced technological solution greatly facilitates the construction industry's design, documentation, and planning process.

SCAN to BIM tools like Leica 3D scanner is capable of visually collecting thousands of data from different physical sites, generating information with a high level of detail, and creating 3D models based on this information.

We can conduct this service for you!

Manufacturing Trends for 2023

We know you set-up your 2023 challenges, and you are working to accomplish all of your goals. So here is a brief summary of 5 key trends in Manufacturing that might help you getting there.

1. Increased use of automation and robotics
2. Greater emphasis on sustainability and environmental responsibility
3. Continued growth of the "Industry 4.0" concept
4. Increased use of 3D printing and other advanced manufacturing technologies
5. Growing importance of data analytics and supply chain management

Is your team ready for all the new challenges?

Training is essential to boosting team productivity and taking classes at our Autodesk Authorized Training Center (ATC) can make it simpler.

Each of our instructors has earned the title of Autodesk Certified Instructor (ACI), demonstrating that they have gone above and beyond the testing necessary for Professional Certification to demonstrate their skill, knowledge, and understanding of the workflow and best practices established by Autodesk. **Improve your skill set by enrolling in one of our courses.**

Three of our most popular classes - new dates added:

CV101: Civil 3D Fundamentals

March 28, 29, 30

Online 1:00pm-4:00pm ET

REGISTER NOW

RA101: Revit Architecture Fundamentals

March 7, 8, 9, 14, 15, 16

Online 1:00pm-5:00pm ET

REGISTER NOW

AE101: AutoCAD Electrical Fundamentals

March 3, 6, 7, 8, 9, 10

Online 9:00am - 12:00pm ET

REGISTER NOW

Autodesk is putting the flex in flexibility

As an alternative to a dedicated subscription, Autodesk Flex offers occasional users a new, cost-effective way to access top Autodesk products for a daily pay-as-you-go rate.

Is Autodesk Flex right for your business?

- Do you have users that only use certain products for seven days or less per month?
- Are you spending money on a dedicated subscription for infrequent users?
- Do you find it challenging to add new users or subscriptions to fast-moving projects?
- Are you hesitant to try specialized tools for different project stages because of cost?
