

Hi,
We feel lucky to have such great customers!
Need help? Ask us! We can augment your staff,
help you meet a deadline or consult with you to
improve your workflows with advanced software
solutions and training.
Call 888-355-0081, or email us today.
Sincerely,
The MicroCAD Team

Two of the most Critical updates for your Autodesk Products

With the arrival of subscription-only Autodesk software, users now benefit from easy access, multiple software versions, and different product collections that suit their industry needs. But be aware that to have the software operating at the fullest you need two components that are essential, and we are talking about the [Autodesk desktop App](#) and the Autodesk Licensing service updates.

The Autodesk desktop App allows the users to stay current with releases, updates, hot fixes and security patches. In addition, they will have access and control of the products and updates directly from the computer desktop. To have the Desktop app up to date, go to settings and check the “Automatic updates for the app”.

In-person Training vs. Online Tutorials (YouTube, LinkedIn Learning)

As tempting as it may be to zip over to YouTube to try to learn AutoCAD, Revit, Inventor, etc., it can tend to be a much more fruitful experience to learn from a live instructor. While there are benefits to online tutorials in that they are on-demand and at your leisure, you don’t have the ability to ask questions. Being able to have open dialogue with a live instructor opens up a world of experience for them to share with you. Instructors typically have been in your shoes, know what it’s like to learn software for the first time and are able to provide you with first-hand knowledge that lead to helpful conversations that make each learning experience unique. There are certainly times (we’ve all been there, those late night working sessions) where you may need to Google a quick fix to solve an issue which can certainly be very helpful in a pinch! However, those videos and tutorials only give you a fraction of what you can learn when you take the time to **invest in yourself** and your company by taking an in-person course.

A sample of our Upcoming Classes:

Software	Class	Date / Time
	RM100 - Revit MEP - Fundamentals (Online - 8 Morning Sessions)	April 5, 7, 12, 14, 19, 21, 26, 28 9:00am - 12:00pm ET
	AC101: AutoCAD 1 - Fundamentals (In-person, VA Office - 3 full days)	March 22, 23, 24 9:00am - 4:00pm ET
	CV101: Civil 3D - Fundamentals (Online - 6 Morning Sessions)	May 10, 11, 12, 17, 18, 19 9:00am - 12:00pm ET
	FS101: Fusion 360 - Introduction to Parametric Modeling (Online - 6 Afternoon Sessions)	April 5, 6, 7, 12, 13, 14 1:00 pm - 4:00pm ET
