MICROCAD
TRAINING & CONSULTING

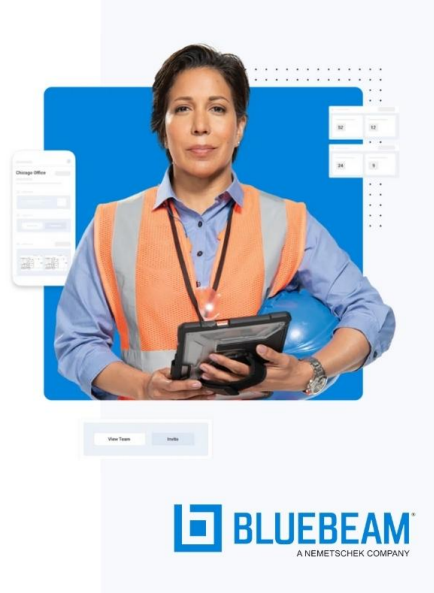

Hi,

We are entering our holiday season and our team at MicroCAD wanted to take a moment and let you know we are thankful for you and hope you have a wonderful Thanksgiving holiday. We're here for you! Contact us if you need support, training, or extra help to meet your project deadline. Call 888-355-0081 or email us today.

Sincerely,
The MicroCAD Team

Learn more about Digital Collaboration with Bluebeam

Besides viewing and editing PDFs, Bluebeam offers a full suite of creation tools, markup tools, and management tools, and it is extremely affordable. You should definitely consider using Revu if you are not already doing so, because it improves your team's productivity by streamlining repetitive tasks and document creation workflow.

In the latest version of Revu, your files and collaboration tools are available in the cloud with annual subscription plans, making Revu the best-in-class solution designed for the AEC industry. As a project-oriented application, Revu offers customized features based on prospective users' specific roles - including owners, superintendents, estimators, contractors, engineers, and architects.

More information:
Join our free [December 15th Bluebeam Webinar](#) or call 888-355-0081 and learn how to add this tool to your current workflow.

Is your team ready for all the new challenges?

Training is fundamental to increase a team's efficiency & learning at our Autodesk Authorized Training Center (ATC), will make it easier. Each of our Trainers is an Autodesk Certified Instructor (ACI), which means they have taken additional training beyond the required testing for Professional Certification to validate their skills, expertise and knowledge in line with the workflow and best practices designed by Autodesk.

Take one of our courses and enhance your skill set.

Three of our most popular classes - new dates added:

RA204:
Site & Structural Design
Jan. 10 & 12
Online 1:00Pm-4:00pm ET

Is Autodesk Premium plan right for your organization?

If you'd like more flexibility, increased security, and easier user management for ten or more subscriptions, then maybe it's time for you to upgrade to a Premium plan.

Here are a few questions to help you decide:

- Are you frequently adding new users, but would like to save time by not having to manually create and assign access?
- Would you like 24/7 support and faster response times?
- Are you needing the additional security features of SSO?
- Do you have employees or contractors based globally that you would like to purchase centrally for?
- Is it difficult to optimize subscription licensing because you don't know which users need product access?

New Product Alert

MicroCAD is now introducing the new **Finishline Pro** software to our AEC Customers.

Finishline Pro is the bridge between your PDF and Design Software with tangible ROI.

Integrate your Bluebeam and Revit software! This is a must-have. Available as a subscription, low cost per user. The bundle is made up of three tools:

- **Finishline Exchange**
 - Import and overlay PDF markups in AutoCAD and Revit with a click of a button.
 - Instant time savings of 3 to 5 minutes per markup versus tradition 2 screen work.
 - Computer resources are not exhausted by running pdf authoring tool with Revit or AutoCAD.
 - Bridges the collaboration gap between teams that use pdf and design software.
 - Speeds collaboration and resolution of markups.
- **Finishline Automation**
 - Enables technique to add Revit elements to your design and construction deliverables.
 - Automating and driving efficiency through an easy-to-use tool that simplifies a process.
 - Place Families and Components Content onto PDFs enabling one Click Insert into Revit.
 - Simple drag and drop or instant placement.
 - Savings of 5-10 minutes per family vs. inserting in Revit without Automation capability.
 - Opens the design door to non-Revit users. Including C Suite and clients.
 - Architects align family names from Revit to PDF for import.
 - Works with system components content like mechanical electrical and plumbing.
- **Finishline Review**
 - Easy to use and inexpensive solution for integrated markups combined with a powerful design and layout engine.
 - Never miss a markup.
 - Works with markups/ families/ and system component content.
 - Facilitates rapid review.
 - Peace of mind and ease of use.
 - Risk management

Be the first to see it live - December 2nd
